PROFESSIONAL SUMMARY

Frontend Developer with nearly 2 years of experience building responsive web applications and dashboards in React.js, JavaScript (ES6+) and TypeScript. Built 4 React applications, including enterprise dashboards and a multi-product SaaS platform, with REST API integration, reusable component architecture, performance optimization and cross-browser compatibility. Working knowledge of SQL and data visualization from an analytics background. Developing skills in technical SEO, JSON-LD structured data and server-side rendering.

EDUCATION

Cummins College of Engineering for Women's, **Nagpur,** 2018 – 2022 | Nagpur
Bachelor of Engineering (B.E.) Electronics and Telecommunications
GPA: 7.11

EXPERIENCE

Ordinet Solutions Pvt Ltd, *Software Developer (Frontend)* 12/2024 – Present | Pune

- Built the IshVed agritech education website with HTML5, CSS3 and JavaScript (ES6+), responsive across mobile, tablet and desktop screens.
- Designed component-based page layouts and UI/UX flows for the learning platform.
- Wrote vanilla JavaScript for DOM manipulation and interactive page behavior.
- Tested cross-browser compatibility on Chrome, Firefox, Safari and Edge, and applied performance optimization techniques.
- Coordinated with the content team to align page design with course content and meet project deadlines.

Aivariant Technologies, *Data Analyst Intern* 12/2022 – 02/2023 | Nagpur

- Cleaned, transformed and visualized Zomato datasets using Advanced Excel, SQL, Power BI and Tableau.
- Built dashboards and reports that presented findings to stakeholders.
- Gathered requirements from stakeholders and presented analysis results.

PROJECTS

Buromatrix – *Project management tool (React.js)*

- Built the full frontend in React.js using a modular, scalable component architecture.
- Developed responsive UI components that follow the brand's design system.
- Managed application state and added interactive features.
- Structured reusable code and optimized performance across devices and screen sizes.

Vistaar Dashboard – *Enterprise analytics dashboard (React.js)*

- Built a responsive dashboard with analytics, reporting, data visualization, user management and operational monitoring.
- Created reusable React components, integrated REST APIs and built interactive charts with ApexCharts.
- Handled application state and data with Zustand, React Hook Form and TanStack Table.

MSPHC Dashboard – *Maharashtra State Police Housing Corporation*

- Built a project management and GIS analytics platform to track infrastructure projects, budgets, resources and performance metrics.
- Created interactive dashboards, map-based project views, KPI monitoring and analytics reports with React, Recharts and React-Leaflet.

Sumeet Harbinger – *Facility operations & maintenance portal (JavaScript, jQuery)*

- Built a web portal for managing employees, locations and areas, operational checklists and assigned work.
- Integrated frontend screens with REST API endpoints for login, records, work, tickets and feedback using XMLHttpRequest and FormData.
- Created dashboard reporting views for attendance, machine usage, work completion and complaints with Chart.js and DataTables.
- Implemented complaint submission with photo upload and customer feedback forms with rating interactions.

Maratha Udyojak – *Multi-product SaaS platform for MSME branding (React, Vite)*

- Built the complete frontend in React and Vite for brochures, digital visiting cards, websites and 50+ festival posts.
- Developed live preview builders with 5 switchable templates, form validation, autosave and desktop/mobile preview frames.
- Integrated Razorpay booking and status APIs to unlock deliverables by plan and lock forms after submission.
- Created reusable website templates (corporate, tech, emerald, executive, dark) with shared section-visibility rules and company branding.
- Synchronized React previews with Mustache HTML templates for backend-rendered public pages and downloadable source.
- Built digital card flows with vCard/QR, contact actions (call, WhatsApp, email) and JPG/PDF export.
- Developed a download hub for PDF, JPG, ZIP and share links, including background ZIP generation for festival posts with cancel support.

SFL Punch – *Attendance and workforce management web application (React, Vite)*

- Developed a responsive attendance and workforce management web application using React, Vite, Material UI and Tailwind CSS.
- Built interactive admin dashboards with charts and date-range filters to monitor shift-wise employee distribution and staffing requirements.
- Implemented secure frontend authentication flow with login, protected routes and session handling for authorized access.
- Created CRUD interfaces for employees, supervisors, shifts and locations with search, validation, filtering and pagination.
- Designed attendance management features including add, edit, delete, attendance filters and record review for daily operations.
- Integrated REST APIs using Axios to fetch and update attendance and user-related data from backend services.
- Added report export functionality, including Excel downloads for attendance and muster roll reports.
- Improved usability with responsive layouts, modal dialogs, reusable components and dynamic data tables, supported by component-based design, centralized API configuration and reusable utilities.

Artiquity – *Art workshops and artwork discovery website (HTML5, CSS3, JavaScript)*

- Developed and maintained a responsive, multi-page website for discovering art workshops, artists, venues and artwork.
- Integrated frontend pages with REST APIs using JavaScript fetch() to retrieve and display dynamic content.
- Implemented search, category and location filtering, pagination and infinite-scroll experiences for browsing listings.
- Built workshop, artist, venue and artwork detail pages with image galleries and interactive UI components.
- Created pass-selection and scheduling interfaces that preserve selections across steps using browser storage.
- Implemented account-related frontend flows, including login screens and client-side session state handling.
- Applied responsive layouts and custom CSS styling across desktop and mobile screen sizes.

CERTIFICATION

Data Analyst Certification, ExcelR *(Reg. No. 18451/EXCELR/10012024)* 04/2023 – 01/2024

- Covered Excel, SQL, Power BI, Tableau and data visualization techniques.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python

Front-End: React.js, Component-based architecture, Responsive web design, REST API Integration, UI/UX Implementation, Performance Optimization, Tailwind CSS, Bootstrap, Vite, Zustand, React Hook Form, TanStack Table, Figma / Design Handoff, Razorpay Integration, Mustache Templating

SEO & Structured Data (Foundational): JSON-LD, Schema.org markup, Google Search Console, Rich Results Test, Schema Markup Validator, meta tags, canonical tags, semantic HTML, Core Web Vitals (LCP, CLS, INP), Lighthouse

Rendering & CMS (Learning): Server-Side Rendering (Next.js), Contentful (headless CMS)

Back-End: REST API, Python, MySQL

Databases & Analytics: SQL querying, Power BI dashboards, Tableau visualization, Data cleaning & transformation, Advanced Excel (VLOOKUP, Pivot), KPI reporting, Python (pandas, numpy), MySQL

Version Control: Git, GitHub
